

Amazon Giveaway Bot

amazongiveawaybot.com

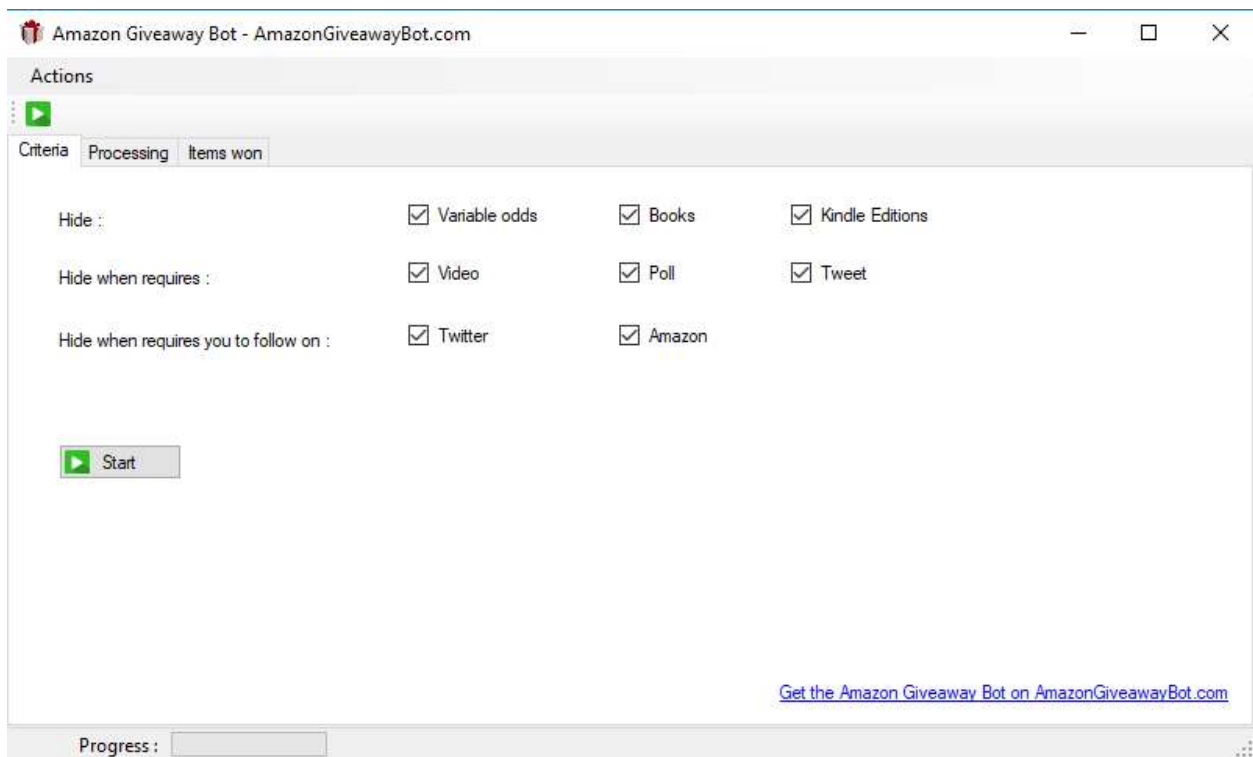

Download the bot after payment.

Open your browser and SIGN OUT OF AMAZON if you are already signed in.

Open the folder and run the app GiveawayBot

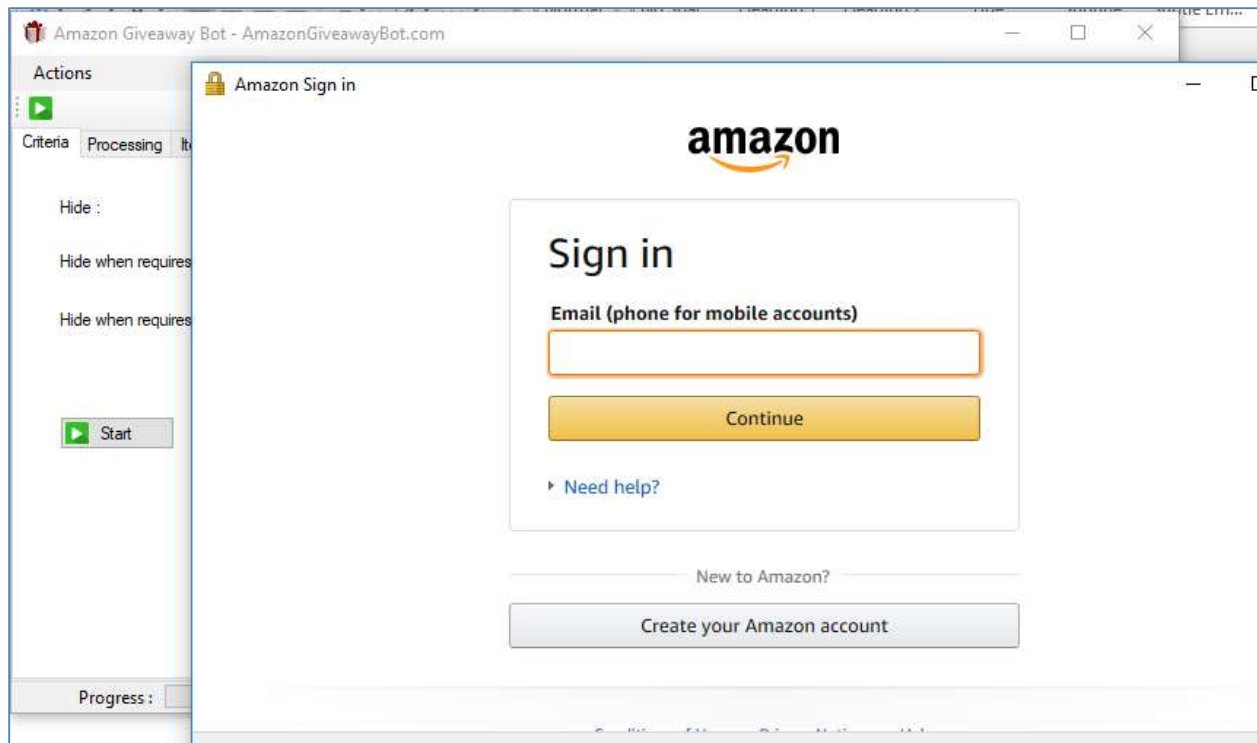

Name	Date modified	Type	Size
 amazonbot	10/4/2018 9:17 AM	Text Document	302 KB
 GiveawayBot	10/4/2018 6:26 AM	Application	268 KB
 HtmlAgilityPack.dll	9/21/2018 4:00 PM	Application extens...	125 KB
 settings	10/4/2018 6:27 AM	XML Document	1 KB

Leave the options selected to fastest results. This should pull in over 1,000 contests daily. If you want to also choose videos, you can unselect but this will drastically slow down the app as each video must wait 15-30 seconds before the app can enter the contest.

Sign into Amazon

Click Actions Menu > Amazon Signin

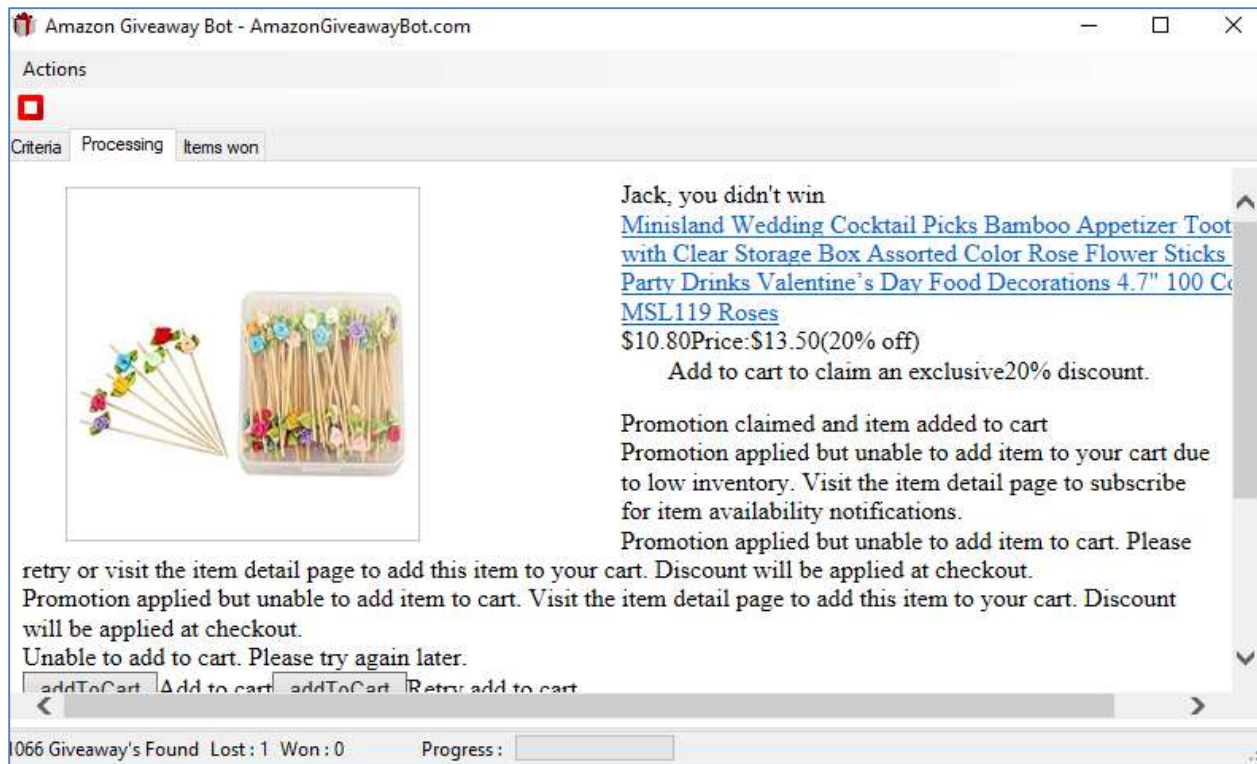

After sign in, close the browser window and you will be left with the app open on the criteria tab.

Click the start button. It will start entering the Amazon Giveaways.

You can watch on the processing tab but you do not have to.

You can minimize the app and it will go through and enter all contests for you.

At the bottom of the app you will see how many contests the bot will Submit to. How many Lost, and how many Won.

If at the end you have winners, you can go to the Items Won tab. This will give you the link of the item you won.

You will have to click the link as Amazon requires all winners to verify address for shipment of your prize.

GOOD LUCK !!!!
